

May 19, 2006

The 2006 Colorado Child and Adolescent Coalition Conference *Widening the Lens: Focus on Community Connections* was very successful! We thank you very much for the role that you played in its success. The conference was well-attended, with most workshops receiving very high ratings. We encourage you to send any suggestions you may have regarding the possibility of future themes and workshops to our conference coordinators at cgtjoe@qwest.net. As members of CCAMHC, your input would be highly valued and we encourage active participation in our conference planning committee.

Please see our website for photos of the conference. There you will also find other useful information such as the schedule of board meetings and a listing of current board members. Each year we strive to make the conference a fulfilling experience for all. What is most telling about our progress toward this ideal is the increased attendance this year and the diverse representation of participants and speakers from all over Colorado and the nation!

New features of CCAMHC that are likely to roll out this year include:

Newly designed and interactive website

Quarterly correspondence with a focus on current policy in mental health and events for members

On behalf of the board of directors, I sincerely appreciate your attendance and participation at the conference. Preparation for next year's conference will be underway soon, so please do not forget to mark your calendars next April when we will convene again for an educational and fun networking experience!

Sincerely,

Ashley M. Tunstall-Runge, NCC, LPC
President
